

Notice regarding OSHA's New Recordkeeping and Reporting Final Rule

On September 18, OSHA published a [final rule](#) in the Federal Register revising the reporting requirements of severe injuries and updating the list of industries partially exempt from recordkeeping requirements established in 29 CFR 1904. Establishments in *federal jurisdictions* must comply with the new requirements beginning January 1, 2015.

In 2006, Kentucky implemented reporting requirements found in [803 Kentucky Administrative Regulation \(KAR\) 2:180](#) that differ from OSHA's current requirements but are similar to the final rule OSHA published on September 18. The Department of Workplace Standards is reviewing the effect of OSHA's September 18 final rule to determine what action by the Labor Cabinet may be necessary. [803 KAR 2:180](#) **remains in effect** in the Commonwealth of Kentucky until a determination is made.

Questions can be directed to the Office of Standards Interpretation and Development at (502) 564-3070.
